

*Volantis: small southern constellation between Star B  
of Carina and the Large Magellanic Clouds.*

**VOLANTIS**

Chronograph and regatta watches.  
Inspired by the flying fish constellation,  
and reminiscent of a yacht in full sail,  
the models in the Volantis line are equipped with a movement  
made exclusively for Piquot Meridien featuring a regatta  
departure function with a 10-minute countdown.

*Five blue and red balls indicate the two 5-minute periods preceding the departure.  
As soon as all the balls are white and the second hand is at 12 o'clock, the gun-shot starts the race.*

*This exclusive movement for the Volantis line features an automatic mechanism with a countdown function, available in both chronograph and watch versions. Piquot Meridien makes no compromise with quality: only stainless steel or stainless steel/18K gold cases, strong aesthetic identity, state-of-the-art Swiss movements.*

*Piquot Meridien watches nail the brand's colours to the mast. They offer sea lovers and professionals alike high-precision Swiss instruments adapted to their specific needs.*

The VOLANTIS line offers a full range of chronograph functions, with 12-hour, 30-minute and 60-second counters for handicap races (cruising).

With their clearly identifiable design and Swiss movement, these timepieces reflect their maritime evocation to the smallest detail: the porthole or anchor chain motif on the bezel, the winch-shaped crown, the bollard pushpieces, and the distinctive sail-stitched leather straps.

This regatta chronograph is fitted with a two-way rotating bezel divided into 360°. When used with a compass, it provides an optimum number of tactical choices for Olympic sailing races.

The indications marked on the dial of the automatic "Racing" model, together with the 360° bi-directional rotating bezel, make this watch a genuine racing instrument.

11103

The points of the compass (cardinal points) are indicated on the bezel of the automatic Regatta model so that the marker buoys can be situated at a glance and the danger avoided.

Five coloured balls: a sign of recognition between sailing enthusiasts. Fitted with an automatic mechanical movement, this regatta watch and chronograph are equipped with an ingenious system developed by Dubois-Depraz. Exclusive to PIQUOT MERIDIEN, this complication indicates the countdown preceding the start of a regatta.

**Uncompromising quality**

Movement	Dubois-Depraz automatic
Chronograph	12-hour, 30-minute and 60-second counters
Complication	10-minute countdown function with coloured disks
Case	Stainless steel or stainless steel/18K gold
Caseback	Stainless steel, screw-down
Water-resistance	100 metres (10 ATM)
Crown	Stainless steel, screw-down
Bezel	Two-way rotating with notches (Chronograph and Racing models) or fixed with compass points (Regatta)
Crystal	Scratch-resistant sapphire
Bracelet/Strap	Solid stainless steel or leather, with stainless steel safety clasp
